

MGQL, Compact Guide Cylinder, Ball Bushing Bearing MGQL12-40

Datasheet

The solution for a linear-actuator subject to high loads. Ideal for material handling applications. Two basic models include a self-lubricating slide bushing and a linear ball bearing style. The 100mm slide bushing model can stop a load of 1300 Kg. traveling at 280 mm(sg, or smoothly lift a centered load of 450 Kg. with a 40% safety factor. The overall package is very compact, and pre-tapped mounting holes ensure easy attachment of fixtures. Mounts on side or bottom. The MGQ offers bore sizes from 12 to 100mm and is switch capable.

Double-acting, single-rod cylinder
