

## Single Action - VHS VHS50-F06A-B

### Datasheet

### General series information

- Modular connection type for connecting to FRL units
- Flow rate up to 8270 l/min
- Energy saving: zero air bleeding while switching the handle
- Safety measure: prevention of accidents caused by inadvertent air supply problems (OSHA standard compliant)
- With built-in silencer for EXH port as an option.

*Directional control valve 3/2-way valve, closed normal position With mechanical control spring, with mechanical component detent control Return with general manual control*

### Standard specifications

|                             |                            |
|-----------------------------|----------------------------|
| Body Size                   | 50                         |
| Thread                      | F (G)                      |
| Port Size                   | 06 (3/4)                   |
| Handle/Bonnet Material      | A (Flame Resistant PBT)    |
| Options                     | B (With bracket)           |
| Semi-standard               | None                       |
| Made to Order               | None                       |
| Pressure medium             | Air                        |
| Maximum operating pressure  | 1.0 MPa                    |
| Minimum operating pressure  | 0.01 MPa                   |
| Proof pressure              | 1.5 MPa                    |
| Maximum ambient temperature | 60 °C                      |
| Minimum ambient temperature | -5 °C (No freezing)        |
| Approvals                   | No need                    |
| Paint colour                | Handle: Red<br>Body: White |
| Handle switching angle      | 90°                        |
| Weight                      | 0.750 Kg                   |

Dimensions
