

VR12*0F, Transmitter - Shuttle Valve with One-touch Fitting - SMC VR1210F-04

Item no. SMC-VR1210F-04

Manufacturer SMC

Applicable Tube OD: 04 (Ø4 Millimeter Size) Body Size: 1 (1/8 Basis)

TECHNICAL DATA

Weight	0.015 kg
Zolltarifnummer	84813099

DESCRIPTION

Series VR1210/1200 shuttle valve is a 3 ported valve with one output and 2 pneumatic signal and input ports. Output is always supplied by high pressure inlet. The VR12**F series are interrupters for control of air pressure signal system lines. Piping is possible in any position and the one-touch fittings make piping connections simple. Time delay valve series VR2110 with its combination of adjustable orifice and fixed flow allows transmission of a pneumatic signal after a fixed time period.
