

Clean and Chemical Resistant Tubing, PFA Tubing - TLM - SMC TLM0403N-2S

Item no. SMC-TLM0403N-2S

Manufacturer SMC

Size: 0403 (ODØ4 IDØ3) Color: N (Translucent) Roll Length: 2S
(2m)

TECHNICAL DATA

Weight **0.027 kg**Zolltarifnummer **39173200**

DESCRIPTION

We are pleased to unveil a new advanced flexible, heat and chemical resistant tubing that is chemically compatible with a wide range of fluids and can resist temperatures up to 260°C. The TLM features improved PFA material, which allows use in applications requiring chemical resistance and can withstand fluids that need to be conducted at very high temperatures. It also comes in four different colours - red, black, blue and translucent - so customers can set differently coloured tubes in a visual way to help ease the maintenance and calibration works process, which is required periodically. What is more, we have extended the size and length variations so customers can select exactly what they need in 13 metric and 9 inch options. It can also be ordered in seven different lengths from 2 metres straight up to 100 metre rolls. Developed to be combined with our extensive specific Fittings Series, the addition of the TLM tube provides customers with a complete solution for their piping equipment needs in one single step.
