

## Wedge and Spread Cylinder, 8.9 kN, 94 mm Max Spread - Enerpac WR5

Item no. ENP-WR5

Manufacturer Enerpac

WR5 compact hydraulic wedge and spread cylinder with 8.9 kN of force and up to 94 mm spread. Single-acting with spring return for very confined work areas.

### DESCRIPTION

The WR5 is a compact hydraulic wedge and spread cylinder for very confined work areas. With 8.9 kN of force it opens gaps up to 94 mm and delivers full spreading force where there is barely room for a tool.

### BENEFITS

- Compact body for use in very tight spaces
- 8.9 kN of spreading force at low tool weight
- Single-acting with spring return for fast reset

### TECHNICAL DATA

- Force: 8.9 kN
- Max spread: 94 mm
- Action: single-acting, spring return
- Max operating pressure: 350 bar
- Weight: 2.3 kg
- Series: WR
