TECHNICAL DATA

Country of Manufacture	Germany
Series	Evolastic
Weight	3.12 kg
Zolltarifnummer	84839089

DESCRIPTION

EVOLASTIC is a highly flexible coupling from KTR with a rubber element. It strongly damps torsional vibration and suits combustion engines and generators.

BENEFITS

- High torsional vibration damping through the rubber element
- Large misalignment compensation

VERSION

Evolastic 560 Elastomer Element-EP WN.

APPLICATIONS

Diesel and generator drives with strong torsional vibration.
