### STANDARDS & COMPLIANCE

DIN 6885

### DESCRIPTION

ROTEX is a torsionally flexible jaw coupling from KTR. It transmits torque positively through an elastomer spider between two jaw hubs and compensates angular, radial and axial shaft misalignment. If the spider wears, the jaws engage with each other so the coupling stays fail-safe.

### BENEFITS

- Sturdy hub for durable torque transmission
- Prepared ready to fit
- Combines with any ROTEX 28 spider

### TECHNICAL DATA

- Size: ROTEX 28
- Material: aluminium
- Bore: 18 mm
- Keyway: DIN 6885/1
